

Visibility and Detection for Sensitive Company Data

SEAMLESS COLLABORATION SECURITY

Reco perfectly complements legacy Data Loss Prevention tools in order to:

- Provide visibility, detection, and remediation for data compromise in collaboration tools
- Reduce the costs of securing and remediating data

VISIBILITY, DETECTION, AND REMEDIATION

Multichannel support:

- Tracks collaboration security across channels
- Provides visibility into data exposure
- Detects risky behavior across Slack, Email, GoDrive, and more
- Enables effortless remediation

SUPPORT COLLABORATION

- Complement existing tools
- Remove blind spots of DLP
- empower teams to work together securely

Our mission is to enable secure collaboration at the speed of business.

Only by understanding the complete business context of an interaction, can security analysts identify, interpret, and determine the best way to respond to potential threats.

Reco provides this business context.

COLLABORATION SECURITY

- Visibility to all data currently exposed internally & externally
- 80% of workers use collaboration tools daily
- Become 30% more effective, securely

ADD RECO TO YOUR SECURITY TOOLS

- Filter out 99% of False Positives
- Free up 40% of the security team's time
- Enhance your security suite to reduce MTTR to just a few minutes

SECURE COLLABORATION AT THE SPEED OF BUSINESS
